

Council Policy

Single Use Plastics

Policy Statement

Council to take a leadership role in the elimination of Single Use Plastics, advocating for legislative change, and influencing and enabling responsible consumption practices.

Principles

The foundation for this policy is based on significant evidence that:

- Plastic pollution is a major cause of global environmental degradation and species decline.
- The pollution and greenhouse gas emissions associated with Single Use Plastic use place an inequitable burden on future generations.
- The production of plastics relies on non-renewable resources.
- Plastic pollution persists in the environment and has detrimental effects on human health.

Implementation

Northern Beaches Council will implement the policy according to the following mechanisms:

- Implementing responsible procurement practices and influencing supply chains.
- Lobbying all levels of government to drive policy change and ban plastic bags.
- Providing leadership in the community through policy and practice.
- Influencing the business and retail community to provide products and services that do not rely on Single Use Plastics.
- Building capacity within the community for change in social practices, via:
 - Promoting alternatives to single use plastic.
 - Researching and developing strategies to enable the community to live without Single Use Plastics.

Scope and application

This policy applies to Council, its employees, agents, lessees and contractors activities within and impacting on the Northern Beaches local government area.
